BURBANK, CALIFORNIA

Distributed through the
PLUMBING AND SHEET METAL TRADE

A. I. A. FILE NO. 29-H

BS LINFOOT

We are proud to present the new Zeigler-Harris Catalog to our customers, whose loyalty and confidence throughout the years has made possible the Roto-Gloss line of today.

It is our aim and responsibility, through unceasing research and development, to improve our products and distribution for the benefit of all concerned.

The ever-increasing demand for Roto-Gloss Stainless Steel Sinks has brought about a threefold expansion of our manufacturing facilities, enabling us to add more new products, such as drain boards, counter tops, stove tops, and many other items to the Roto-Gloss family.

Our years of experience in the exclusive manufacture of stainless steel products, is your assurance of highest quality.

ORDERING INFORMATION

NOTES

1. Custom sinks, drainboards, counter tops, electric or gas stove tops, etc., of all sizes fabricated to specifications submitted.
2. Indicate raised edge, flat flange or positive seal flange by using letter F, R or PSFL after model number.

EXAMPLE: A-10-7-F (for flat flange), or A-10-7-R (for raised edge, for tiling). A-10-7-PSFL (positive seal flange) for linoleum, plastic or wood sink tops.

3. All flanges on flat rim sinks have 1½" radius corners unless otherwise specified.
4. ***Please furnish complete hole punching information for faucet and drain holes. Indicate type of fixture to be used.***

EXAMPLE: Punch ledge, 3 holes, 4" center to center standard. Provide 4th hole for spray attachment, left or right side. Drain opening 3½".

Punch two holes, 4" center to center. Standard center-set. Drain opening 2".

Leave ledge plain, no holes.

Punch ledge for_____

_____

Name and fixture number

Sequoia Lavatory—Punch 3 holes, 2" center to center, or 3 holes 6" center to center. Center hole for pop-up rod.

CAUTION: ***Specify Type 316 Stainless Steel for Photographic sinks. When sinks are used for other chemical requirements metallurgical data for correct application will be furnished on request.***

GENERAL INFORMATION

Sink bowls may be purchased without drain hole in bottom to facilitate special uses as per customers requirements.

Suitable fixtures and strainers will be supplied if not available to customer.

All models having the standard 3½" drain opening are recommended for use with garbage disposal units. For dimensional clarification in figuring double or multiple units welded together, allow ¾" for sink partition, plus both flange dimensions. (Flat flange 1" to 1½"; positive seal flange 1¾").

All models are drawn from 17 gauge 18-8 type 302 stainless steel.

Specify stainless steel crumb cup strainers for 3½" drain openings.

All models quoted less fixtures and strainers.

All sizes are approximate.

All models supplied less drain openings for use as clay bins for school construction.

Please give full information when ordering so that your order may be processed without delay.

All prices F.O.B. Burbank, California. Prices subject to change without notice.

SHIPPING INFORMATION

All sinks packed in single cartons. Additional charge for export crating. F.O.B. Burbank, California.

Specify ROTO-GLOSS finish - easy to keep clean - ageless beauty

Roto-Gloss is an exclusive finish featured on all sinks, drain boards, counter tops, electric or gas stove tops, etc., manufactured by Zeigler-Harris Co. No other sinks have Roto-Gloss. It is your guide to the finest in Stainless Steel products.

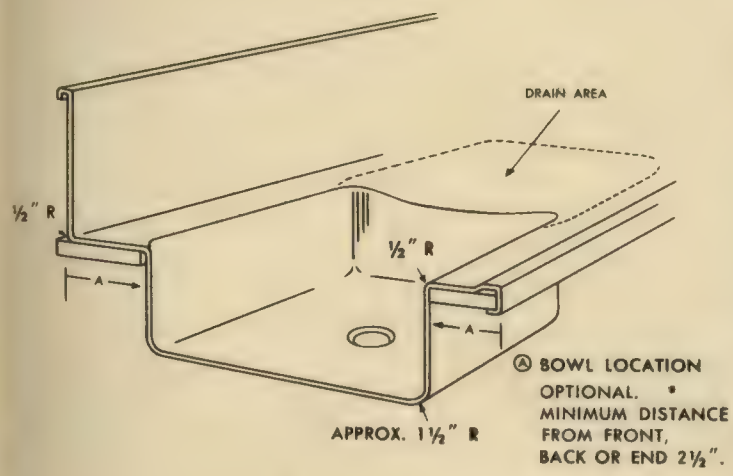
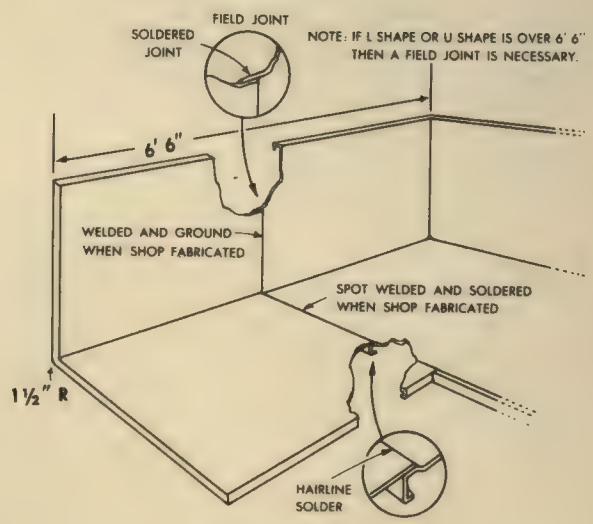
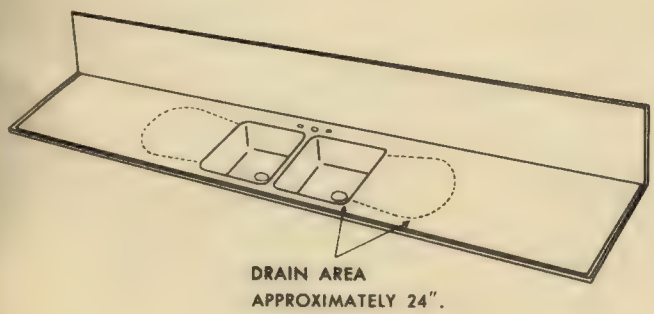
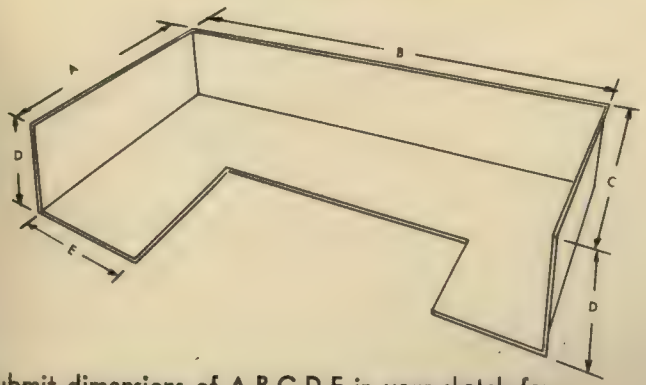
CUSTOM STAINLESS STEEL
SINK AND DRAIN BOARD UNITS

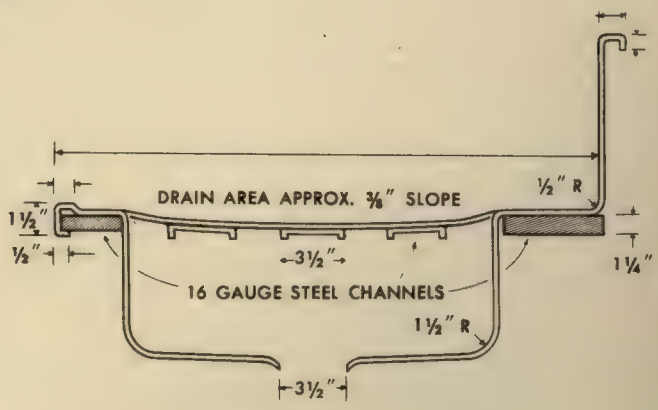








Submit dimensions of A-B-C-D-E in your sketch for price quotation.



Specifications

Drain board and sink of 16 gauge 18-8 type 302 stainless steel. All structural channels to be of 16 gauge mild steel, no wooden cores or framework allowed. Sink bowls shall be stainless steel butt-fused. All welds ground and polished so that all joints are invisible. No lap joints or solder seams allowed with the exception of field joints in L shaped or U shaped boards. Interior and top surfaces to be finished in Roto-Gloss. All horizontal and vertical radii on sink bowls blended to a mirror finish. All undersurfaces to be covered with approximately ⅛" heat-resistant underseal for sound deadening and prevention of condensation.
